## **ACTION**

### ***Response to Reply Brief***

The reply brief filed on March 11, 2003 has been considered. Applicant argues that, "*In Tezuka, a centrally disposed bolt mounting the ram head (2) to the plate (7) would require a sufficient clearance hole ...to allow for assembly of the ram (2) to the plate (7).*" This argument is found persuasive, in that sufficient clearance would be necessary to start a screw thread in the ram head of Tezuka for mounting a bolt. Additionally, Applicant's remarks that, any shaft that mounts the ram head must allow the ram head to rotate and cannot have excessive clearance because excessive clearance would create uneven wear in the clearance hole in the plate (7) of Tezuka is also found persuasive. Accordingly the rejection with regard to the prior art reference Tezuka is withdrawn.

### ***Allowable Subject Matter***

Claims 1-15 are allowed.
